Key Concept: Relationships
Global Concept: Identities and Relationships
Statement of Inquiry: Through relationships organisms interact with the natural environment, transferring matter and energy

Task:
You have been asked to write a report to discuss the following proposal:

**All blackberry plants should be destroyed.**

1. You will need to give both sides of the argument (dot points in a table or a PMI chart is fine for this section).
   - Click on the LibGuide on the Library Portal to help you.
   - You can also search the Internet using the following keywords such as: blackberry, weeds, and invasive plant species to find other useful sites. Don’t forget to research other countries as well as Australia.
   - This section can be done in groups. You will be allowed two lessons of research and discussion time.

2. Present a contention for or against the proposal.
   - This will be written up in sentences and will represent your point of view given the research that you have just conducted.
   - Your written piece can include discussion points for the other side but need to explain why you chose your view.
   - This section should include correct scientific language and have specific examples to support your conclusion.
   - You will be allowed 45 minutes of writing time (test conditions) to complete this section.
   - Your mark will be based upon this written piece.

3. Include a bibliography. This can be completed during your research time and brought to class on the day when you write your proposal. Please use MyBib

Your proposal should be presented on an A4 sheet of paper and can be typed.
You will need to submit your report at the end of the lesson by email to your teacher.
Please save your work in the following format: FullName_Class_Proposal
